jQuery	Vue	PHP	

WORK EXPERIENCE

Interad - Web Developer - Aug 2021 - Present

Developed and maintained comprehensive applications using JavaScript, TypeScript, jQuery, React, Angular, Vue, and WordPress. Exceeded client requirements for Fidelity and RBC through the implementation of rigorous unit testing while verifying SEO strategies and accessibility requirements. Effectively communicated with clients and project managers to realize product goals while providing meticulous documentation and maintaining version control using git.

Reliance - Web Developer - Jan 2020 - Aug 2021

Developed and maintained responsive cross platform web applications using HTML, JavaScript, CSS, Vue, and React. Utilized an advanced understanding of Adobe Creative Cloud to innovate design standards and grow the established brand identity. Communicated clearly and effectively with clients to exceed strict deadlines.

STEM Minds - STEM Coach – Apr 2019 - Dec 2019

Instructed classes. Managed learning plans and educated students. Was responsible for maintaining computer equipment, resolving all technical issues and creating a positive learning environment.

EDUCATION

OCAD U - Integrated Media - 2015 – 2019

Digital media program focusing on design, film, audio, animation, etc. Work included the development of film and digital applications, as well as game development. Projects were developed and released while incorporating user feedback.

Humber - Web Development - 2020 – 2021

Full-Stack Web Development program featuring database design, web application development, user experience implementation and accessibility standards including ASP.NET, Node.js, React, Python and other methods of web development.
